**Cedar Mills Yacht Club Open House**  
Saturday, August 10<sup>th</sup> at 5:30 PM

The Cedar Mills Yacht Club officers and club members are excited to host an open house event for guests and prospective members. The club will sponsor a cookout at the CMYC clubhouse located inside Cedar Mills Marina across from middle cove (near the public boat ramp). We encourage boaters from Cedar Mills to stop by and share some delicious food and get more information on the club and its many membership benefits. We invite you to consider joining the Cedar Mills Yacht Club, a community where the joy of boating and the warmth of friendship create a vibrant social atmosphere. More information on CMYC activities and events is available at [www.cmyc.org](http://www.cmyc.org) or at [www.facebook.com/cedar.mills](http://www.facebook.com/cedar.mills). Questions about the club or this event? Reach out to our Commodore at [cmdcmcy@gmail.com](mailto:cmdcmcy@gmail.com) for additional information.

Cedar Mills Yacht Club is more than just a place to dock your boat; it's a gateway to new friendships, memorable experiences, and a deeper understanding of the nautical lifestyle. We invite you to join us and become part of a community that celebrates the spirit of the water. If you would like to attend this open house event, we request that you please RSVP to [cmdcmcy@gmail.com](mailto:cmdcmcy@gmail.com) by or before, Thu, August 8<sup>th</sup> so that we can get an accurate headcount in order to plan for food.

## Vacation Home

**Contact Cedar Mills Marina 903-523-4222**

Do you know the 20 degree rule?

Set your air conditioner thermostat no more than 20 degrees less than the outside temperature. For example, if it is 93 degrees outside, you should set your thermostat at a minimum of 73 degrees. The reason why this is important is based on how the air conditioner functions.

### Top 5 maintenance Tips for Marine Air Conditioners

1. Clean all sea strainers.
2. Clean return air filter on A/C system.
3. Inspect evaporator coils on A/C.
4. Clean debris from A/C condensation drain pan hose.
5. Make sure power cord is plugged in and secured.
